Thanks Gorm. Lots of conflicting objectives, no clear guidelines – but on the last call Amec didn't sound like they are twitching to hit the off button asap, like they had been. I do hope Beede is ready to turn off soon, those operators have had it pretty tough –

Hope you and Bettina have a great holiday –

Eva

Eva,

Here you go! Yes, Amec knows that we are not totally done yet. It is such a complex matter, isn't it? It really depends on how much you believe in the EBR/MNA effectiveness, and how we handle the NAPL on the outside when it comes to this decision.

Happy holidays!!! Bettina says hi. We are on the way to Denmark.

Gorm

Hi Gorm –

Happy Holidays!

Missed you on the Williams call yesterday. Seems that maybe AMEC is somewhat anyway resigning themselves to the fact that they aren't likely to be 'done' at the end of the month??

I looked on TerraTherm's website for the detailed questionnaire for getting a conceptual cost estimate for a site, but couldn't find it. Can you provide me a link or a copy of the questionnaire? I saw your name on the bottom of one as the person to return the filled out form to – In the last month or so, I have been asked to look at 3 additional sites for the applicability of thermal remediation, so things are getting busier than ever.

Thanks Eva
